Summary

Georgia Tech Computer Engineering student with experience in software engineering, data analysis, and API integration. Skilled in Java, Python, and UI design. Currently expanding into AI with personal machine learning projects. Proven leadership through Girls Who Code presidency.

Education Qualification

Georgia Institute of Technology

Bachelors of Science in Computer Engineering

Dean's List | GPA: 4.0

Atlanta, GA

July 2027

Technical & Professional Skills

- Python, Java
- Amazon Web Services
- Software Dev
- Data Structures and Algorithms
- App Dev
- Digital Marketing
- Computing and Programming
- REST API dev
- Public Speaking
- Effective Communication
- Collaborative Teamwork
- Initiative and Leadership

Project Experience

Neural Network for Handwritten Digit Recognition, Python, Custom Data Structures March 2025

- Implemented a neural network from scratch to classify MNIST digits using BFS traversal
- Implemented layer-wise input propagation without machine learning libraries.
- Achieved accurate predictions on clean digits; noted sensitivity to messy handwriting

Java Data Analysis Framework, Object-Oriented Data Processing Tool March 2025

- Built a Java framework to perform DataFrame-style operations on CSV data
- Implemented type-safe APIs for column operations, group-by logics, and statistical functions using generics and functional interfaces.

Professional Experience

Software Engineering Intern at Wellnessys

Alpharetta, GA | August 2023 - May 2024

- Collaborated with interns to develop algorithms and features for a digital yoga mat
- Utilized CLI for project development; improved Python and algorithmic skills

Extracurricular Activities

Girls Who Code

Alpharetta & Athens, GA | Aug 2021 - May 2025

- President of high school chapter; led collaboration across schools
- Initiated and organized events reaching 100+ students in Forsyth County
